The Vertical Integration of the 3 Business Activities provides a buffer against market swings

Proximity to End Markets

- Egypt's location allows a **competitive lead time** on shipments and relatively **low transportation costs**
- Close proximity to end markets enables Arafa Holding to **respond quickly** to seasonal shifts in demand and changes in consumer tastes

Low Cost Environment

- Egypt offers a **sizeable young labor force**, with over 50% of the population under the age of 30, at a relatively low cost compared to other emerging markets that operate in the labor-intensive Apparel & Tailoring segment
- Costs of inputs for **infrastructure** and **utilities** are among the least expensive in the region

Preferential Trade Agreements

- A number of preferential trade agreements — including agreements with the United States, the European Union, COMESA, Turkey and the GCC countries — position Egypt as a **prominent hub for export-oriented companies**

Egypt offers advantages including proximity & low-cost to end markets and a basket of beneficial trade agreements

Gov't Incentive Programs

- Egypt's free zones offer **tax incentives to export-oriented manufacturers**; Arafa's manufacturing facilities in free zone areas allow it to benefit from these incentives (**Duty free zones**)
- The government maintains the long encouraged export activity through offering **incentives programs** in support of **export-oriented manufacturers**.
- Egypt's export councils announced launching **new export incentives program** during FY 2019. However, **no details** still confirmed on implementation mechanism of new program.
